

Manmohan Maloo

Full Stack Developer

maloomanmohan810@gmail.com | 7232010574 | Ahmedabad, India | Open to Remote

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building scalable web applications using the **MERN stack**, **Nuxt.js**, **Vue.js**, and **TypeScript**. Proven expertise in frontend architecture, REST API integration, role-based access control (RBAC), and translating Figma designs into responsive, production-ready interfaces. Currently contributing to a live **HRIS/Employee Management Platform** with modules deployed to production. Comfortable working across the full development lifecycle — from architecture design and API contracts to deployment and analytics via Google Cloud services.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, PHP, Python, HTML5, CSS3, C, Java
Frontend Frameworks:	Nuxt.js, Vue.js 3, React.js, React Native, Tailwind CSS, ShadCN UI, Nuxt UI, Webflow
Backend / Runtime:	Node.js, Express.js, REST API Design & Integration
Databases:	MongoDB, MySQL
Google Services:	Google Maps API, Google Analytics (GA4), Firebase Console, Google Cloud Console
Dev Tools:	Git, GitHub, GitLab, VS Code, Cursor, Postman, Render, Figma
Architecture:	RBAC, Module-based folder architecture, MVC, State management, Component design
CS Fundamentals:	Data Structures & Algorithms, DBMS, OOP, Operating Systems

WORK EXPERIENCE

Senior System Developer Crew.inc	<i>Jan 2026 – Present</i> <i>Ahmedabad, Gujarat</i>
Leading frontend development of a scalable HRIS and Employee Management Platform built on Nuxt.js / Vue.js. Core modules are live in production, handling organizational workforce operations including employee records, attendance, and role management.	
- Architected scalable frontend using Nuxt.js, Vue.js 3, TypeScript, and Tailwind CSS with a module-based folder structure for maintainability - Implemented Role-Based Access Control (RBAC) and route-level authentication guards - Integrated 20+ REST APIs with structured Pinia state management and business logic layers - Built interactive dashboards and data visualizations using Nuxt UI and Nuxt Chart - Integrated Google Maps API for location-based employee and branch functionalities - Translated Figma designs into pixel-perfect, responsive, production-ready components - Set up Google Analytics (GA4) for full web analytics, user behavior tracking, and performance insights - Managed Git & GitLab workflows — branching, MRs, code reviews, and CI/CD coordination - Collaborated directly with backend team to define and align API contracts and data schemas	
Front End Developer Adeshwar Marketing	<i>May 2025 – Present</i> <i>Ahmedabad, Gujarat</i>
Working across multiple live client projects while spearheading development of Crew.inc — an HRIS platform built with Nuxt.js and Vue.js.	
- Built and shipped features across projects using PHP, Nuxt.js, React.js, React Native, and Webflow - Led frontend development of the Crew.inc HRIS platform, now partially deployed to production - Improved team coordination, code quality, and UI/UX consistency across multiple concurrent projects - Explored and integrated diverse web technologies to continuously expand technical proficiency	
Full Stack Developer Intern Syndell Technology Pvt. Ltd.	<i>Jan 2025 – Apr 2025</i> <i>Ahmedabad, Gujarat</i>

- Developed full-stack features using the **MERN stack** (MongoDB, Express.js, React.js, Node.js)
- Built responsive React UIs and integrated RESTful backend APIs with Express and MongoDB
- Implemented **JWT-based authentication**, CRUD operations, and Mongoose data models
- Used **Git & GitHub** for version control, PR reviews, and collaborative development

Data Science Intern
Infividhya Pvt. Ltd.

Jun 2024 – Jul 2024
Ahmedabad, Gujarat

- Applied **Python (Pandas, Matplotlib, NumPy)** for data preprocessing, analysis, and visualization
- Worked with real-world datasets to extract business insights and present findings to the team

PROJECTS

- Chatify** | *React.js, Node.js, Socket.io, MongoDB, Express.js, JWT*
Real-time full-stack chat application with Socket.io-based messaging, JWT authentication, user presence indicators, and private/group chat rooms.
- Imagify – AI Image Generator** | *React.js, Node.js, Express.js, OpenAI API*
AI-powered image generation app integrating the OpenAI DALL-E API. Features prompt-based generation, history tracking, and image download.
- Coaching-Guru** | *React.js / Nuxt.js, Node.js, AI/LLM API Integration*
AI-powered adaptive learning platform that generates personalized course content tailored to individual learner goals and knowledge levels using LLM APIs.
- Portfolio Website** | *React.js, Tailwind CSS*
Designed and developed a personal developer portfolio with project showcases, skills section, and contact form — fully responsive and performance-optimized.

EDUCATION

Bachelor of Engineering – Computer Engineering
Ahmedabad Institute of Technology

2021 – 2025
CGPA: 7.73

CERTIFICATIONS & ACHIEVEMENTS

- **Machine Learning Training** – Completed a comprehensive ML course covering Python, Scikit-learn, and data pipelines
- **Internal SIH Hackathon (College Level)** – Built **GemLoot**, a real-time product price comparison API
- **Hack This Fall – MLH (Karnavati University)** – Developed an AI-powered **crack detection system** using computer vision
